ATS GROUP IS INVESTING 100 MILLION DOLLARS IN THE CONSTRUCTION OF A NEW SITE FOR SMALL CALIBER AMMUNITION IN TEXAS, THE USA

ATS GROUP has started preparations for its new production site for small caliber ammunition in Texas, the USA, worth 100 million dollars. The location in Texas has been determined and the factory is expected to start production by the end of 2025. The site with a production area of 50,000 m² will produce 200 million pieces of small caliber ammunition a year, mostly for the US market. All products comply with the NATO standards and will be sold under the world-famous brand of ATS AMMO - maneuver bullets, steel core bullets and proprietary ammunition parts manufactured with 4.0 IoT technology.

ATS GROUP, seated in Skopje, is a modern Macedonian corporation consisting of four companies, three of which in Skopje and one in Samokov, with more than 500 staff and 40 years' experience. The Group works to the highest standards producing a wide range of products with globally recognized quality, which is made evident by their numerous achievements and awards. ATS Group manufactures composite products for ballistic protection and ballistic safety designed for the army and the police. In addition, the company produces small caliber ammunition, as well as a production line for the development of the whole ensemble of ammunition production machinery, thereby increasing its export potential and implementing its development plan and mission every year in a row. All products that the company produces comply with the NATO standards.

In its area of operation, the company competes with the largest global industry manufacturers. It has leading engineering expertise, machines and tools for ammunition production, and has recently added technical textile, ATS UD ARAMID 230, necessary for most ballistic products, to its range of products.
